Photoshop is part of the Adobe Creative Suite. A relatively small number of features are built into the program, and the rest of it is a collection of Adobe Photoshop Plugins. Deoxynivalenol Promotes Maturation of Dendritic Cells Through EGFR-NF-κB Signaling Pathway in Mice. Deoxynivalenol (DON), a toxic fungal metabolite, has been suggested to be associated with the induction and deterioration of multiple immune diseases. Here, we investigate the effects of DON on the development and maturation of dendritic cells (DCs) in vivo and in vitro. Results showed that DON (10 μg/ml) caused the disappearance of immature and the decrease in mature DCs. After 24 hr stimulation, the productions of TNF-α, IL-6, IL-1β, and IL-10 in DCs were significantly enhanced, and it was accompanied by the activation of EGFR and its downstream NF-κB pathway. The abrogation of EGFR could cause the inhibition of the productions of TNF-α, IL-6, IL-1β, and IL-10. Treatment with DON also resulted in the increased numbers of spleen and bone marrow derived DCs (BMDCs). Additionally, treatment with DON caused the upregulation of the expression of MHC-I and MHC-II on BMDCs. Meanwhile, treatment with DON led to the increased phagocytosis in BMDCs. Taken together, our data indicate that DON has the ability to promote maturation of DCs through EGFR-NF-κB pathway.Q: Check if date greater than two dates - PHP I have two dates in php $s = $date1."
